

Greetings dear kumite,

345 laying hen will arrive at Charming House Yoko Farm, Vätö, from Öland in April.

We are starting to practice regenerative yoko farming to have nature return in all its prosperity and sequester carbon into the earth where it belongs.

We intend to produce the best relationship with the earth.

Here is an inspirational example of Sweden for you to watch:

De första 13 åren med Fjällbete - a Fjällbete:

<https://youtu.be/kWhdVAuneGc>

<http://fjallbete.se/>

Would you like to adopt a and pick up a carton of 30 Mimatsuri in Skarpnäck every

You can also adopt several for as adopt half a hen for a carton every

We would like to have you pre-order cartons we expect to produce every customers without any waste.

regenerative yoko hen on Vätö Charming House Yoko Eggs after month?

many cartons every month, or other month.

now to make sure that the 145 two weeks in July find their way to

Otherwise to be honest, we may need to slaughter some of them. We prefer to keep all the 345 hen, produce as many as possible the best possible yoko eggs and contribute their healthy energy to as many people as possible. We hope to be allowed to expand next year and the year after (to 700 and 1050 hen) to fulfill that commitment. We also hope to be allowed to add some cows and sheep for perfectly imperfect synergy in holistic yoko grazing.

To adopt your hen(s) in pre-order now, please swish 135 SEK (per hen or half hen) to Sophie at 0738-166199 and include in your message explicitly how many hen you are adopting. Alternatively, if you wish to pre-order a single carton for testing, please swish 150 SEK and tell us in your message.

After your pre-order is received and confirmed back to you by text message, you can pick up your coupon(s) after Mimatsuri in the parking opposite the entry to the Okiyomesho, with the back of the car opening towards the building on the other side.

We expect to be producing the first 10 cartons of Charming House Yoko Eggs in May, about 180 cartons in June and to be at capacity of 145 cartons every 2 weeks in July. We have 10 of 345 hens adopted so far, on Vätö and by kumites. You are invited to announce when you want to pick up your first carton(s) and redeem your coupon(s) at that time and we will confirm that we expect your pick up on the upcoming pick up date or another pick up date that you indicate.

Thank you so much for your consideration. We hope to meet you personally at an open day on the farm in the Spring when the hen have established themselves. We are taking farming and our food supply back in our own hands as Yokonoen, and we would love to share that experience with you.

Regenerative yoko greetings,
Halbert & Sophie Karssiens
